### Summary

Demonstrative transportation scenario:

- How many 60 ft. [18.3 m] CL 1 RS, Steel, Wood and Concrete poles can be shipped in a single truckload?

### Problem

With single-piece poles, especially those over 60 ft. [18.3 m], larger equipment, highway escorts, over length permits and more truckloads are required to transport pole resources.

### RS Pole Solution

- RS poles are transported in compact nested bundles.
- Lightweight RS modules can be transported using standard trailers and equipment.
- Reduced transportation costs per pole.
- For 60 ft. [18.3 m] CL 1 poles, the RS pole's nested design can ship 26 more poles than concrete; 13 more poles than wood; and 5 more poles than steel on every truck.

### Truckload Quantity Comparison 60 ft. [18.3 m] Class 1 Poles
